

CAPSTOCK MULTIPLE ACCOUNTS APPLICATION FORM (SUB ACCOUNT)

INSTRUCTIONS TO FILL IN THE APPLICATION

To open a sub-account, please fill in this form and scan it to the following e-mail address: accounts@capstockfx.com

With Capstock, you have the possibility of opening multiple accounts denominated in an existing currency or a different one. This is mostly suitable for clients looking to transact in different currencies and want to avoid currency risk. It is also convenient for traders who would like to hold FX positions without closing the initial position. For example, if you are buying the dollar and you then take a short position in USD - if on the same account, they will be netted against each other while if on different accounts, you will be only shorting the dollar.

Each Sub-Account will be treated on its own and have its own margin. You can therefore be at risk in one account without affecting your other accounts - even a profit on the main account will not compensate if there is a margin risk on a sub-account. As such, each sub-account will be differentiated from other accounts.

REQUEST FOR MULTIPLE ACCOUNTS

Client's name: _____

Client's Trading Account Number: _____

Number of Additional Accounts: _____

Currency of additional Accounts: _____

If opening a Sub-Account in the same currency as an existing account, please inform us of the reason:
